Label element

Signal word Warning

Hazard statements

Flammable liquid and vapor.

Causes skin irritation.

Causes serious eye irritation.

Harmful to aquatic life.

Precautionary statements

Prevention: Keep away from heat, hot surfaces, sparks, open flames and other ignition

sources. No smoking. Wash face, hands and any exposed skin thoroughly after handling. Avoid release to the environment. Wear protective gloves/ protective

clothing/ eye protection/ face protection.

Response: IF ON SKIN (or hair): Rinse skin with water [or shower]. If skin irritation occurs: Get

medical advice/attention. Specific treatment (see on this label). IF IN EYES: Rinse

cautiously with water for several minutes. Remove contact lenses, if present and easy to do.

Continue rinsing. If eye irritation

Storage: Store in a well-ventilated place. Keep cool.

Disposal: Dispose of contents/ container to an approved facility in accordance with local,

regional, national and international regulations.

Other hazards: No data available.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Identity:	Silicon compounds	2-diethylaminoethanol
CAS number:		100-37-8
Content in percent:	>80%	<3%

^{*} All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

The exact concentration has been withheld as a trade secret.

4. FIRST AID MEASURES

Description of first aid measures

General advice Immediately remove contaminated clothing.

Inhalation Following inhalation of aerosols or mist: Possible discomfort: irritation of mucous lining

(nose, throat, eyes) cough, sneezing, flow of tears. Move to fresh air. Get medical

attention if any discomfort continues.

Eye contact Keeping eyelid open, immediately rinse thoroughly for at least 5 minutes using plenty of

water or, if necessary, eye rinsing solution. Consult an eye doctor (ophthalmologist).

Skin contact Wash off immediately with soap and plenty of water. If skin irritation persists, get

medical attention.

Ingestion Rince the mouth with water. Drink plenty of water in small sips. Get immediate medical

attention.

Self-protection of the first aider No data available

Most important symptoms and effects, both acute and delayed

Symptoms None known.

Hazards: None known.

Indication of any immediate medical attention and special treatment needed

endoscopy in order to assess mucosa lesions in the oesophagus and stomach which may

appear. If necessary, aspirate leftover substance.

5. FIREFIGHTING MEASURES

Extinguishing media

Suitable extinguishing media Water spray, fog, CO2, dry chemical, or alcohol resistant foam.

Unsuitable extinguishing media High volume water jet.

Special hazards arising from

Standard procedure for chemical fires.

the substance or mixture

Special fire fighting procedures: Water used to extinguish fire should not enter drainage systems, soil or

stretches of water. Ensure there are sufficient retaining facilities for water used to extinguish fire. Fire residues and contaminated fire extinguishing

water must be disposed of in accordance with local regulations.

Special protective equipment and precautions for fire-fighters

In case of fire: wear a self-contained respiratory apparatus.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:

Use personal protective equipment. Ensure adequate ventilation.

Accidental release measures: No data available.

Methods and material for

containment and cleaning up: Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal

binder, sawdust). Fill into marked, sealable containers. To be disposed of in

compliance with existing regulations.

Environmental precautions: Do not allow entrance in sewage water, soil stretches of water, groundwater, drainage

systems.

7. HANDLING AND STORAGE

Precautions for safe handling

Technical measures: No data available.

Local/Total ventilation: Provide adequate ventilation.

Safe handling advice: Use in the open air or with adequate ventilation.

Contact avoidance measures: No data available

Storage

Safe storage conditions: Take precautionary measures against static charges, keep away from sources of

ignition. When repairs of the production system are to be made (e.g. welding work), the section to be repaired must be essentially free of product. Keep containers tightly

closed in a cool, well-ventilated place. Protect from moisture.

Safe packaging materials: No data available

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

Occupational Exposure Limits Observe national threshold limit values.

Biological Limit Values No biological exposure limits noted for the ingredient(s).

Appropriate Engineering Controls Provide adequate ventilation.

Individual protection measures, such as personal protective equipment

General information:

Eye/face protection:

Hand Protection:

No data available.

Safety glasses

Material: Butyl rubber.

Break-through time: >= 480 min

Glove thickness: 0.5 mm

Material: Fluorinated rubber (Viton)
Break-through time: >= 480 min

Glove thickness: 0.4 mm

Additional Information: Selection of protective gloves to meet the requirements of specific workplaces., The suitability for a specific workplace should be discussed with the producers of the protective gloves., The information is based on our own tests, references from the literature and information from glove manufacturers, or derived by analogy with similar materials., Be aware that in daily use the durability of a chemical resistant protective glove can be notably shorter than the breakthrough time measured according to EN 374, due to the

numerous outside influences (e.g. temperature).

Other: Suitable protective clothing

Respiratory Protection: In case of dusts/vapours/aerosols being formed or if the limit values like TLV are

exceeded: use respiratory equipment with suitable filter (filter type ABEK) or wear a self-contained respiratory apparatus Use only respiratory protection equipment with CE-symbol including four digit test number. The filter class for

the respirator must be suitable for the maximum expected contaminant concentration (gas/vapor/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used. Note time limit for wearing respiratory protective equipment.

Hygiene measures: When using, do not eat, drink or smoke. Wash face and/or hands before break

and end of work. Immediately remove contaminated clothing. Wash contaminated

clothing before re-use.

10. STABILITY AND REACTIVITY

Reactivity No dangerous reaction known under conditions of normal use.

Chemical stability Stable under the recommended storage and handling conditions.

Explosion data

Possibility of hazardous reactions None under normal processing.

Conditions to avoid Keep away from heat and sources of ignition. Keep away from moisture. In the

presence of oxygen and heat, the ethanol forming during the reaction may produce acetaldehyde. Material may form acetaldehyde when heated with

inorganic pigments in the presence of air.

Incompatible materials Water.

Hazardous decomposition products Ethanol in case of hydrolysis. Alcohol formed by hydrolysis lowers the

flash point of the product.

11. TOXICOLOGICAL INFORMATION

Persistence and Degradability

Biodegradation

Product: No data available.

Components:

Silicon compound 75 %, 28 d, OECD 301 D, The product is easily biodegradable.

2-diethylaminoethanol 90 - 100 %, 22 d, OECD 301 A, The product is easily biodegradable.

BOD/COD Ratio

Product: No data available.

Components:

Silicon compound *No data available.*2-diethylaminoethanol *No data available.*

Bioaccumulative potential

Bioconcentration Factor (BCF)

Product: No data available.

Components:

Silicon compound Not bio accumulative.

2-diethylaminoethanol The product is not bioaccumulating.

Partition Coefficient n-octanol / water (log Kow)

Product: No data available.

Components:

Silicon compound *No data available.*2-diethylaminoethanol *0.46, calculated.*

Mobility in soil:

Product No data available.

Components:

Silicon compound Adsorption on the floor: low.

2-diethylaminoethanol Not expected to adsorb on soil.

Other adverse effects:

Other hazards

Product: Harmful to aquatic life.

Additional Information: No ecotoxicological data is available for this product.

13. DISPOSAL CONSIDERATIONS

Disposal methods: With respect to local regulations, e.g. dispose of to suitable waste incineration plant.

Contaminated Packaging: Do not reuse empty containers and dispose of in accordance with the regulations

issued by the appropriate local authorities. If there is product residue in the emptied container, follow directions for handling on the container's label. Incorrect disposal or reuse of this container is illegal and can be dangerous. Other countries: observe the

national regulations.
